

Product Brief | Rimage Professional™ 2400

A powerful system integrator solution

Rimage Professional 2400 systems are high-performance systems for creating CDs, DVDs and Blu-ray Discs™ with customized digital content and direct-to-disc printing. The Professional 2400 is the perfect system for integrators developing fully automated, intelligent and in-house digital publishing solutions with an attractive acquisition price and a low, long-term cost of ownership for end-users.

Benefits

Small footprint

The 2400 is a compact unit designed to fit in virtually any work environment. Fewer cables and connections mean increased data throughput, faster disc production and a reduced overall footprint.

Network connectivity

The Professional 2400 system can be easily networked using an external PC and Rimage Software Suite.

Integrated printer

Rimage's Everest™ 400 printer is the market's only fully integrated 400 dpi printer, providing indelible, high-resolution images and sharp, easy-to-read text.

Unmatched performance

The three-bin carousel enables three media types to run concurrently. Publish up to 18 full DVD-Rs (4.7 GB) and 30 full CD-Rs (700 MB) per hour with hands-free operation.

Features

Backed by Rimage's decades of experience in designing and building hardware, the Professional 2400 standard features include:

- Two quick-release recorders
- LCD status display
- Rotating three-bin 150-disc carousel for input/output
- External five-disc output bin
- Integrated Everest 400 thermal retransfer printer
- Rimage Software Suite
- Optional combinations of CD/DVD and Blu-ray recorders

Professional 2400

Media Kits

The Professional 2400 is designed for use with Rimage E2400 Media Kits. E2400 Media Kits contain optimized ribbons and 1,000 CDs/DVDs or 500 Blu-ray discs to ensure you produce the best-looking, longest-lasting results in one convenient and affordable package.

Blu-ray Disc™ is a trademark of the Blu-ray Disc Association.
